

# Network Access Visibility and Intelligence

## PRODUCT PORTFOLIO

*Identity-centric user and endpoint access  
control for networks of any size*

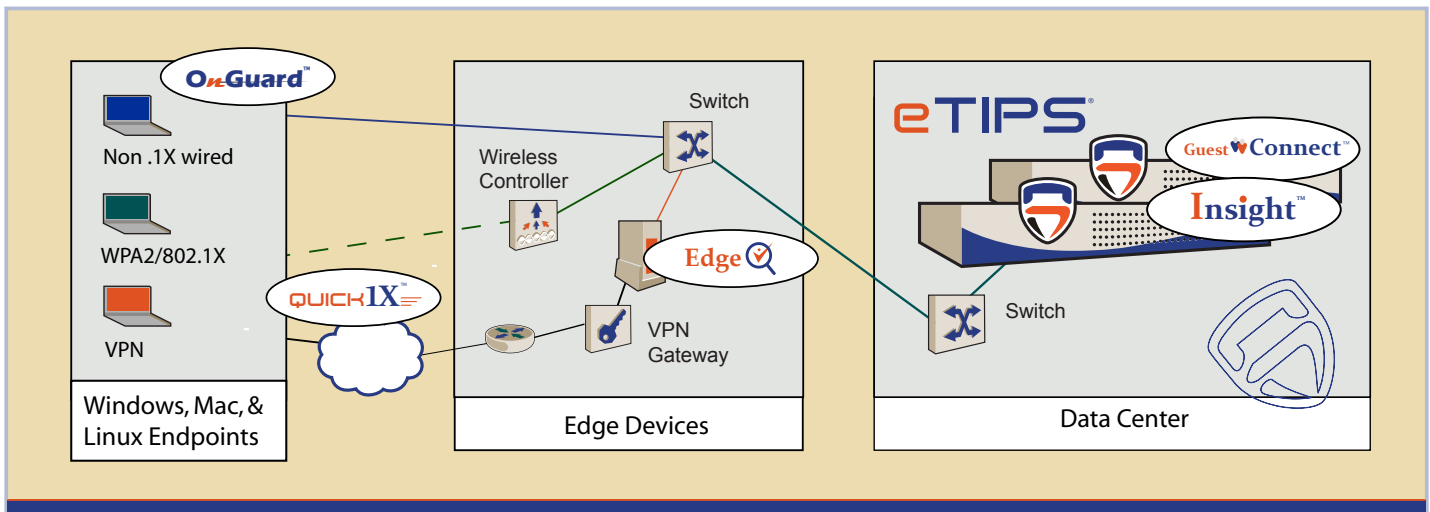

### Our Customer's Advantage:

- Multiple Access Use Cases Addressed
- Industry Acknowledged Ease of Use
- Support for Windows, Mac OS X and Linux
- Flexible Policies for Smart Devices
- Health, P2P, and Patch Management Checks
- Enhanced Visibility and Compliance Reports
- Highly Scalable Policy Architecture
- Attractive Price Points

**Gartner.**  
Magic Quadrant for  
NAC, 2010

Avenda's product portfolio simplifies how organizations deploy and manage stronger network access security for wireless, wired and VPN networks.

Support for industry standards ensure that appropriate access privileges are enforced, regardless of users role, endpoint type or location.

## Insight™

Advanced reporting delivers greater user and endpoint access analytics, in-depth reports, network visibility, compliance, and regulatory data. Additional features:

- Custom report templates
- Realtime alerts
- Data aggregation from all eTIPS

## QUICK1X™

A simple wizard-based tool for the configuration of user's endpoints when connecting to 802.1X/WPA2 enabled wireless and wired networks. Additional features:

- Point-n-Click .1X configuration
- Cloud-based IT deployment
- Works with or without eTIPS

## eTIPS™

Avenda's flagship eTIPS identity-based AAA/NAC platform provides full-featured employee and endpoint authentication and authorization, guest access sponsorship, and easy-to-use troubleshooting and compliance reporting tools.

- Scalable deployment options
- Multi-vendor support
- Remote management

## Avenda Tops NAC Shortlist ...

## NetworkWorld NAC Clear Choice Review, 2010

## OnGuard™

Persistent agents used for health checks and endpoint control on Windows, Mac OS X and Linux platforms. Additional features:

- Network protection with endpoint remediation
- Mixed non and 802.1X support
- Real-time messages and actionable control

## Edge

Avenda's remote access authentication gateway enables the assessment of endpoint health checks of devices connecting over VPNs.

Additional features:

- Optional endpoint health checks
- Per session filtering
- Supports any VPN gateways

## Guest Connect™

Advanced guest access application offers multi-tiered sponsorship roles with per sponsor web portal customization and reporting.

Additional features:

- Endpoint MAC self-registration
- Optional endpoint health checks
- PCI payment system integration
